Please read each statement and initial it. Ask me anything before you sign.

Client name _____ Date _____

ABOUT YOUR TREATMENT _____

I understand a facial may include cleansing, exfoliation, steam, extractions, masks, massage, LED light and professional skincare products, and that my esthetician will explain any step I ask about. INITIALS _____

I've shared my full health history, including medications, allergies and recent treatments. I understand that leaving something out can put my skin at risk. INITIALS _____

I understand that extractions can leave temporary redness or marks, and that I can ask to skip them. INITIALS _____

WHAT TO EXPECT _____

My skin may be pink, sensitive or tight for a few hours, and some people notice a few breakouts or flaking for several days as the skin adjusts. These usually settle on their own. INITIALS _____

Results vary from person to person and depend on home care. No specific result has been promised to me. INITIALS _____

I'll follow the aftercare I'm given, contact the studio if anything worries me, and see a doctor for any reaction that is severe or doesn't improve. INITIALS _____

Esthetic treatments are cosmetic. My esthetician doesn't diagnose or treat medical conditions and may refer me to a doctor or dermatologist. INITIALS _____

CONSENT _____

I've read and understood this form, my questions have been answered, and I consent to facial treatments at this studio today and at future visits. I can ask to stop a treatment at any time.

Peel (esthetician fills in) _____ Strength / layers _____

BEFORE YOUR PEEL _____

I don't have cold sores, open wounds, or irritated, sunburned or broken skin on the area. If I'm prone to cold sores, I've said so. INITIALS _____

WHAT TO EXPECT _____

The peel may feel warm, tingly or itchy. Afterward my skin may look red, tight or shiny. Flaking often starts around day 2 or 3 and finishes within a week, or I may not peel visibly at all. INITIALS _____

Possible reactions include lasting redness, swelling, breakouts, crusting and, rarely, darkening or lightening of the skin, blistering or scarring. Sun exposure raises the risk of dark marks. INITIALS _____

I won't pick, peel or scrub flaking skin. I'll avoid heat and heavy sweating for 48 hours and pause retinoids and exfoliants for 7 days, or as advised. INITIALS _____

I'll wear broad-spectrum SPF 30 or higher every day and avoid direct sun and tanning for at least 2 weeks. INITIALS _____
